Research Interests I am a research scientist at Adobe Research working in RL, LLMs/MLLMs, and alignment. In this role, I am engaged in both research, deploying research into Adobe products, and mentoring interns. My research focuses on post-training alignment for LLMs and VLMs, developing methods that make deployed products better, understanding reasoning, synthetic data generation, and reward modeling.

Work Experience

Research Scientist 2, Adobe Inc., San Jose, USA — 2026, July – present
Research Scientist 1, Adobe Inc., San Jose, USA — 2025, March – 2026, July

Products

1. **Agentic post-training: Express Agent Orchestrator (Adobe Express, launched at Adobe MAX 2025 Keynote):**
   - Led post-training of the VLM deployed in production as the orchestrator behind the Express AI Assistant. The model interprets user intent, plans multi-step tool calls, and executes editing actions inside Express.
   - Built the synthetic data generation pipeline for tool-use and planning trajectories, used to scale training across several tools/action types.
   - Aligned automated evaluation with human feedback. Used these custom evals to find failure modes in intent understanding and tool planning, then closed them through targeted data and training-recipe changes validated with controlled ablations.
2. **RL post-training and reward modeling for Firefly Gen5/Gen6/6.5 image & video editing:**
   - Drove RL post-training of Adobe Firefly Gen5/Gen6 editing models (100B+ parameters), benchmarking policy-optimization methods (Flow-GRPO, Diffusion NFT variants) to identify the best reward–stability trade-off for production.
   - Shipped forward-process RL (AdvantageFlow, advantage-weighted least squares) into the Firefly foundation RL pipeline for Gen6/6.5; by optimizing the flow directly rather than back-propagating reverse-process policy gradients (Flow-GRPO), it sidesteps credit assignment across denoising steps and matches DiffusionNFT's best reward in under half the training time [Paper].
   - Architected a disaggregated RL rollout framework in the foundation codebase that decouples rollout generation from policy training, cutting end-to-end training time and improving GPU utilization.
   - Built internal reward models for lighting, camera angle, and harmonization, calibrating them against human-preference judgments to align editing-task rewards with perceived quality.
3. **Synthetic data and RL for small on-device LMs (Adobe Document Cloud):**
   - *English Document Overview (Acrobat Reader, shipped Oct 2025).* Contributed to pre-training and post-training. Built part of the pre-training mix by combining Nemotron-CC with synthetic data generated from GPT-OSS-120B.

- *Spanish Document Overview (Acrobat Reader).* Led RL post-training for multilingual adaptation. Generated Spanish synthetic data with SmolLM3-3B, scored it with reward models and task-specific rubrics, and post-trained the deployed model on it.

Education

University of Wisconsin-Madison, Madison, USA — Fall 2019 – 2025, Feb
Ph.D., Electrical & Computer Engineering
Adviser: Dr. Robert Nowak, Dr. Josiah Hanna and Dr. Qiaomin Xie

University of Wisconsin-Madison, Madison, USA — Fall 2019 – 2021
M.S, Electrical Engineering
Adviser: Dr. Robert Nowak

Indian Institute of Technology Madras, India — 2015–2018
M.S (Research), Computer Science
Advisers: Dr. Balaraman Ravindran and Dr. Nandan Sudarsanam

West Bengal University of Technology, Kolkata, India — 2009–2013
Bachelor of Technology, Computer Science & Engineering

Mentorship:

Primary Mentor: Daeun Lee — StreamGaze project (paper submitted to CVPR 2026); Yidhong Huang (current); Alice Mao (current)

Co-Mentor: Junghyun Lee; Yash Savani

Research Internships

1. **Amazon.com Inc., Santa Clara, USA:** Summer 2024 (Full-time), Host: Branislav Kveton, Yifei Ma, Anusha Lalitha, Kousha Kalantiri, Aniket Deshmukh. Working on Alignment for Multi-objective optimization with LLMs.
2. **Amazon.com Inc, Santa Clara, USA:** Fall 2023 (Part-time), Host: Branislav Kveton, Yifei Ma, Anusha Lalitha, Kousha Kalantiri, Ge Liu, Aniket Deshmukh, Anoop Deoras. Working on RLHF with LLMs
3. **Amazon.com Inc, Santa Clara, USA:** Summer 2023 (Full-time), Host: Branislav Kveton, Yifei Ma, Anusha Lalitha, Ge Liu, Aniket Deshmukh, Anoop Deoras. Worked on Active In-Context Learning with LLMs
4. **CMU, ECE Dept., Pittsburgh, USA:** Summer 2019, Host: Gauri Joshi. Worked on Structured Bandits
5. **Adobe Research, San Jose, USA:** Spring 2018. Host: Branislav Kveton. Worked on Item recommendation with Ranking and Bandits
6. **INRIA, SequeL Lab, Lille, France:** Fall 2017, Host: Odalric Maillard. Worked on Non-stationary Bandits

PhD Thesis (ECE, UW-Madison) Adaptive Data Collection for Policy Evaluation, Multi-Task Learning and LLM Alignment[Thesis] (RL, OD, LLM)

Master's Thesis (EE, UW-Madison) Active Sequential Hypothesis Testing with Extension to Active Regression and Multi-armed Bandits [Thesis] (RL, OD)

Master's Thesis (CS, IIT Madras) Finite-time Analysis of Frequentist Strategies for Multi-armed Bandits [Thesis](RL)

Teaching Experience

Teaching/Research Assistant, UW-Madison 2019–2025
Matrix Methods in Machine Learning - Prof. Robert Nowak
Mathematical Foundation in Machine Learning - Prof. Robert Nowak
Teaching Assistant, UMass Amherst 2018–2019
Natural Language Processing - Prof. Mohit Iyyer
Design of Algorithms - Prof. Daniel Sheldon
Teaching Assistant, IIT Madras 2015–2018
Introduction to Programming - Prof. Raghavendra Rao B. V.
Reinforcement Learning(twice) - Prof. Balaraman Ravindran

Reviewer and Service

1. AISTATS, UAI, AAAI, ICML, ICLR, NeurIPS, TMLR, KDD, RLC, CVPR
2. Main Co-ordinator of SILO seminar at UW-Madison

Award Grants and Fellowship

1. Top reviewer award for UAI 2023, Neurips 2023
2. Student Scholarship for AAAI 2018, UAI 2022, Neurips 2023
3. UW-Madison nominee for Apple PhD fellowship and Two-sigma PhD fellowship. Received UW-Madison Chancellor's Opportunity Fellowship 2019-20, UW-Madison ECE Welcome Award of USD 3000.
4. IIT Madras student travel grant of USD 2300, Google travel grant of USD 1700, Microsoft travel grant of USD 1435 (declined).

Other Achievements

Ranked 1150/155190 candidates in Graduate Aptitude Test in Engineering **(GATE)** 2014.
Secured 98.93 percentile in Common Admission Test **(CAT)** 2014 among 196988 candidates.
